

Light is vision.

Industrial Endoscopes

Volpi has more than 30 years of experience in the area of optical inspection with industrial endoscopes.

Endoscopy provides assessable images in areas of work that would otherwise be accessible only after extensive disassembly. The use of industrial endoscopes saves time and reduces costs based on downtime.

Application Areas:

- Automotive
- Aerospace
- Chemical and Petrochemical Plants
- Hydrogen and Syngas Plants
- Power Plants
- Marine Engines
- Food Industry

Technical Expertise

- Micro Endoscopes
- Fiber bundle endoscopes
- Lighting systems
- Optic systems
- Process engineering
- Controlled environment
- Custom made endoscopic systems due to specific ambient conditions (temperature, humidity, flammable or explosive substances, etc.)
