

Light is vision.

Facilities

Thanks to our modern facilities we can offer you high-quality and most innovative products and services.

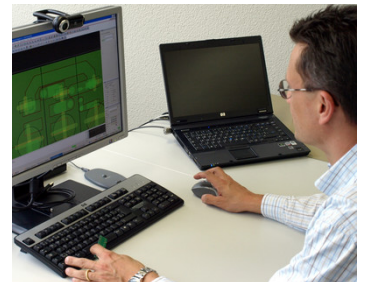

Glass Fiber Drawing

Volpi's own glass fiber production allows us to provide glass fibers that are made-to-order for customers. By using different cladding and core glasses, the glass fibers can be adapted to the particular application.

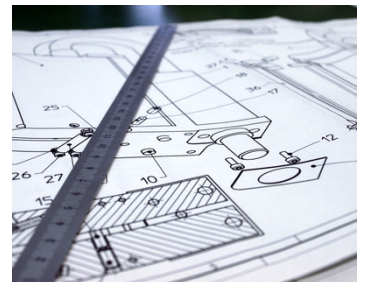

Engineering and Development

We use the most modern software tools for development and engineering.

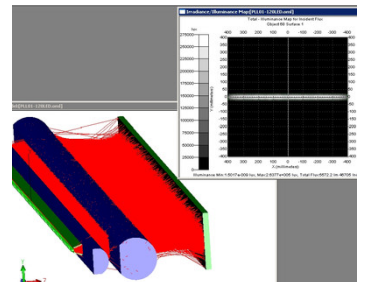

Prototyping

Prototypes will be produced fast and efficiently in our in-house prototype workshop.

Optics Laboratory

We use the most modern tools for all kinds of simulations, measurements and calculations.

Light is vision.

Manufacturing

Production of precise optical instruments sometimes still requires a manual processing of ultra-thin glass fibers.

Service Workshop

We guarantee highest quality of our products and services. However if a product from Volpi fails it will be analyzed and expertly repaired in our service facilities.
